Introduction

This document describes the procedures on how to connect two VT 9000 Wireless DECT headset with a desk phone.

Pre-Requisites

This procedure can be initiated with one desk phone (without a lifter and headset port) connected to a phone line and with the complete package of two VT 9000.

Procedure

1. On the desk phone, unplug the handset cable from the phone body and connect the handset cable to the port marked  on the first base.
2. Plug the supplied telephone cable from port marked  on the first base, and then plug the other end of the cable to port marked  on the second base.
3. On the second base, please connect the supplied telephone cable from port marked  and connect the other end of the telephone cable into the handset port on the desk phone.

Please see image below of the setup.
